SUMMARY

Full Stack Developer with hands-on experience in building production-ready web applications using React, Next.js, and FastAPI. Skilled in designing autonomous AI systems, real-time architectures, and UI/UX design.

EDUCATION

Pranveer Singh Institute of Technology
Bachelor of Technology in Information Technology

Kanpur, India
Oct. 2023 – May 2027

PROJECTS

- GitFixAI** | *React, FastAPI, WebSockets, Supabase, GitHub API, LLMs* | [Live Demo](#) Feb 2026
- Architected an autonomous CI/CD agent that detects, analyzes, and patches codebase vulnerabilities and linting errors using LLMs (OpenAI/Gemini)
 - Integrated GitHub OAuth and REST API to automatically clone repositories, create feature branches, commit fixes, and open Pull Requests
 - Engineered a real-time dashboard with session-isolated WebSocket connections, streaming live analysis logs and AST-based code diffs
 - Hardened backend for production with custom IP-based rate limiting, strict environment validation, and secure HTTP headers
- DocFix** | *Next.js, React, TypeScript, Supabase, Stripe, TailwindCSS, Framer Motion* | [Live Demo](#) Jan 2026
- Created a full-stack PDF toolkit with compression, merging, and AI summarization, achieving 90+ Lighthouse score
 - Integrated Google Gemini AI to summarize documents, reducing reading time by 80% for 100+ page PDFs
 - Configured Supabase Auth with server-side middleware, securing 5+ protected routes
 - Established Stripe payment integration processing subscriptions at Rs.125/month
 - Reduced PDF file sizes by up to 70% using quality-based compression algorithms
- Aether Eye** | *Python, FastAPI, React Native, ESP32, YOLO, WebSockets* Oct 2025
- Engineered hybrid-edge surveillance system with 2 ESP32 microcontrollers and Python backend
 - Deployed YOLO and face recognition models achieving 95% threat detection accuracy
 - Architected WebSocket communication delivering real-time alerts with sub-500ms latency
 - Constructed React Native app handling live video at 30 FPS with push notifications

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C/C++, HTML, CSS, SQL (PostgreSQL)
Frameworks: React, Next.js, React Native, Node.js, FastAPI, TailwindCSS, Framer Motion
Backend & Cloud: Supabase, PostgreSQL, REST APIs, GitHub API, Stripe API, WebSockets
AI/ML: LLMs (OpenAI/Gemini), YOLO, Face Recognition, Vosk (Speech Recognition)
Version Control: Git, GitHub, GitHub Actions, Branch Management, Pull Requests
Developer Tools: VS Code, Vercel, Render, Postman, Figma

EXPERIENCE

- UI/UX Design Intern** May 2025 – Aug 2025
Tackle Studioz *Remote*
- Designed marketing posters and website templates aligned with brand guidelines, increasing user engagement by 25%
 - Led end-to-end UI/UX design for a School ERP system, creating wireframes, user flows, and interactive prototypes
 - Collaborated with developers to ensure seamless handoff and user-centered implementation of designs

ACHIEVEMENTS

- National Semifinalist, Rift Hackathon 2026:** Placed in the top tier of teams at the Physics Wallah Institute of Innovation hackathon by architecting and presenting GitFixAI, an autonomous agent.
- Solved 150+ Data Structures and Algorithms problems across LeetCode, GeeksforGeeks, and HackerRank.
- Designed and assembled custom IoT hardware prototype with dual ESP32 microcontrollers.
